Exit Exam	23 rd July				
Instructors return home	The 24 th of July 2010				

An instructor must successfully complete the training for each course they wish to teach. This is a program that includes 100-130 hours by the end of the Instructor Institute.

This training consists of the following mandatory activities:

Online training 10 weeks

- Attend weekly online training sessions via a web chat conference
- Complete assigned mandatory weekly homework and practice quizzes
- Pass midterms and final assessments for Database Design and Programming with SQL or if enrolled pass the midterms and final assessments for Database Programming with PLSQL

In-class training (5 days)

Attend daily training at the Institute in Austria – 5 days for both Database Design and programming with SQL and Database Programming with PL/SQL
 The Exit exam will be offered twice at the event on Thursday and Friday.

During the in-class training, participants receive industry-leading instruction by expert Senior Oracle Academy trainers. In class instruction builds on the training conducted by the Academy adjunct faculty. Participants continue learning the content while developing a deeper understanding of the course's industry relevance. The Academy Adjunct faculty shares lessons learned while teaching the content to secondary students.

In-class training is a unique opportunity that allows instructors to:

- Study the course materials in projects from Oracle Academy experts.
- Practice and review activities and receive professional and peer feedback.
- Present curricular projects and receive feedback from Academy faculty and their peers.
- Develop a better understanding of the IT industry relevance behind concepts taught in the curriculum.
- Demonstrate a thorough knowledge of course content as evidenced by passing the Academy's exit exam. Those who do not pass the exit exam on the final day are given 60 days to attempt the exam until successfully passed.
- Network globally with other instructors from their region and around the world.

Note: It is highly recommended that schools recognise the time required for instructors to complete the training. Instructor's benefit from all of the following:

Dedicated time for online training (approximately 8-10 hours per week)
Desktop or Laptop computers
Home or School high-speed Internet connectivity

Adjunct Instructors

We recruit highly successful participants from previous years to manage new instructors into the program. This provides each new instructor with a dedicated resource who has taught the courses in a secondary school environment. An adjunct instructor will be training the new instructors and available by email and web chats during the virtual training and the institute. Throughout the school year dedicated Oracle Academy support staff is available to answer questions that teachers may have.

Cadres

All instructors are assigned to cadres, which are groups of instructors managed by an adjunct Oracle Academy certified trainer. Each week prior to online web chats, instructors complete mandatory homework and/or exams. On the web chats adjuncts explain complex concepts, they also answer curriculum content questions.

During the Institute in-class training, all instructors are assigned to a classroom where both Oracle Academy trainers manage the teaching schedule and delivery. Attending Instructors in most cases share a computer and work in pairs throughout the classroom Institute training. Attendees may be assigned to a different Oracle Academy trainer at the Institute than the one they had during the online training. This mix of persons enriches the attendees' experience.

Travel Details– Prague

All attendee travel and accommodation expenses for Oracle Academy Institutes are the sole responsibility of the participant or their institution.

Airports

Prague Airport

http://www.prg.aero/en/site/sluzby_letiste/doprava_parkovani/doprava_na_letiste/mhd_autobus.htm

If taking the train (Airport Express) from the Prague Airport to “ Prague Main Train Station”, from the same place continue using metro line C, the destination is “I.P. Pavlova “

If taking the bus 119 from Prague Airport to Dejvická (metro line A), from the same place continue using metro line C, the destination is “I.P. Pavlova “

Bus stop:

- Terminál 1
- Terminál 2 – in front of the Arrival hall

Public Transport Ticket

- Public Transport counters in Arrival Halls of Terminals 1 & 2 (from 7 am to 10 pm),
- Automats placed at bus stops (cash required),
- From a bus driver (cash required).

Ticket prices/Fares:

- Basic Fare - 26 CZK - ticket can be used for up to 75 min on all means of public transport
- Tickets purchased from a bus driver - 30 CZK for a 75-minute worth of use on all means of public transport
- Airport Express Fare - 50 CZK for a one-hour use of this line only

Trains

“ Prague Main Train Station”. " Train station is the closest station to our training center.

Transportation To Your Lodging

Taxi

Cost approximately 550 CZK (from Airport), time duration approximately 45 min

Recommended contacts:

Taxi Jirka: +420605359369

Taxi Michal +420731599412

Hotel Accommodation

The suggested hotels are located closest to the institute and should be **booked directly by your school or college.**

Note: Prices are an estimate subject to change. Cheaper rates may be available via the Internet.
